Dear Sir,

Sub: Disclosures of information under Regulation 30

Pursuant to Regulation 30 read with Schedule III Part A of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 and following related discussions in the Board Meeting held on October 29, 2021, the Company informs as under:

"Xpro India Limited intends to pursue material expansion of capacity by adding new manufacturing lines for Dielectric and other technical grades of biaxially oriented polypropylene film. The first phase would double capacity at its existing facility at Barjora, West Bengal, to be followed by a second phase either at Barjora or another appropriate location. These phases are expected to span the next 2 - 4 years, also taking into account long equipment delivery periods.

This expansion would support value enhancement driven by organic growth within the Company's core competencies and boosting its proven export performance. Growth in established market sectors and via development of new grades of film is expected to be reinforced by exciting developments in energy saving alternatives, renewable energy, and electric vehicles (EV's) at home and abroad.

Xpro India aims to consolidate its position as a premium manufacturer having a globally important position in supplying state-of-the-art dielectric film products and intelligent solutions for all our niche customers."

The above is for your information and record.

Thanking you,

Yours faithfully,
For Xpro India Limited

Amit Dhanuka
Company Secretary
